Architecture, Project Management, Client Support, PHP, MySQL, WordPress, Amazon S3, Amazon EC2, Amazon RDS, Amazon Route 53, Amazon CloudFront, HTML5, CSS3 (animations), Foundation, SASS, jQuery, JavaScript, Google Maps API, Google Places API, Documentation, Responsive Design, Adobe Photoshop, Adobe Illustrator

- Full-time position to help bring experience to a young and growing interactive team
- Built, tested, and maintained responsive B2C websites
- Assisted and advised with hiring of new interactive team members
- Introduced scrums to help stay organized and on priority within a fast-paced environment
- Introduced security standards to help keep IP data more secure

Multiple Positions / Flight Centre Ltd. / February 2009 - March 2012

Architecture, Project Management, Documentation, Amazon EC2, Amazon RDS, PHP, MySQL, AJAX, jQuery, Facebook API, Facebook Development, HTML5, CSS3, JavaScript, Google Maps API, Google Analytics API

Global Social Media Technologist (full stack developer) / April 2011 - March 2012

- Created a custom CMS for Facebook and micro-site contests
- Directed technical solutions involved with Flight Centre's brand new global social media strategy
- Managed over 120 projects over the course of the year

- Interviewed and trained candidates for web development
- Conceptualized, developed, and maintained a WordPress multi-site system
- Authored process documentation from end-to-end solutions such as blogs, Facebook contests, and micro-site contests
- Collaborated and liaised with third-party vendors

Front End Developer / April 2010 - March 2011

- Moved to Australia by invitation of global e-commerce leader (recognized for strong work ethic)
- Worked with an enterprise front end development team on large websites (e.g. flightcentre.com.au, studentflights.com.au) with millions of monthly user visits

Full Stack Developer / February 2009 - March 2010

- Created an internal system for retail consultants to allow clients to agree to terms and conditions for booked travel online (processed over 500,000 customers in its first year)
- Helped develop the next version of flightcentre.ca, converted Photoshop designs to XHTML, developed website contests which allowed users to post their photos or videos to enter to win prizes and vote, and developed the flightcentre.ca WordPress blog.

Volunteer Full Stack Developer / Project Peru / March 2008 - September 2011

PHP, MySQL, HTML, CSS, WordPress, Adobe Flash, Adobe Photoshop, Fund Raising, Videography

- Consulted for NSCAD students on web development practices and technology solutions
- Collaborated on Adobe Flash development of projectperu.ca
- Assisted with fundraising activities (posting flyers, painting a house, acquired weekly meeting space)
- Selected and researched equipment for recorded video in remote locations of Peru (approximately 30 hours of footage)
- Developed the first version of threadsofperu.com
- Assisted in the research, setup, and creation of the first version of the Threads of Peru eBay store
- Consulted with a third-party tourism company on web development practices and technology solutions
- Participated in fundraising \$20,000 in 5 months
- Participated in cutting-edge international development design
- Collaborated on print and social media marketing of the project
- Hands-on interaction and study with foreign language communities in Peru

Senior Web Developer (full stack developer) / EZD Consulting Inc. / October 2001 - August 2008

Architecture, Client Support, PHP, MySQL, HTML, CSS, JavaScript, Adobe Flash, ActionScript, Adobe Photoshop

- Developed turn-key solutions to deploy directory web sites within hours or days and a proprietary CMS
- Developed websites ranging from small business solutions to community websites receiving +10,000 unique hits a month
- MySQL optimization/design for user information, e-mail lists, billing info, addresses, and website performance/statistics
- Involved with hiring and training new developers

HOBBIES AND OTHER PASSIONS

In my spare time, I am active with softball, ultimate frisbee, airsoft, family, friends and video games.

REFERENCES

To whom it may concern,

I am pleased to write this letter of reference for Jason Rundell. I've worked with Jason over the last 5 years in various capacities; coworkers, Jason reporting into me, and engaging Jason as a contractor. During that time Jason has played a key role in the success of Social Media within Flight Centre Limited.

Jason brings a creativity to technology rarely seen in many developers. He led development of the successful campaign Best Travel Job Ever along with various other projects when he was with Flight Centre. When we launched the global Social Media strategy at Flight Centre Jason managed the daunting task of building out our custom Social Media CMS and our global blog system (GBS). Since then the CMS has hosted close to 300 Facebook and microsite applications while the GBS hosts 20 blogs globally for our various brands.

Jason continues to be a resource that I count on not only from a development perspective but also as a trusted advisor for future development and the evolution of our technology platforms.

I'm available if you're interested in discussing this any further.

Thank you,
Gregg Tilston
Global Social Media Leader
Flight Centre Limited

To whom it may concern,

I am writing this to recommend Jason Rundell as a potential employee. I have used Jason's web-building services to produce my own website and I found him very detailed and extremely helpful. He listened to my needs as a client and what I wanted for the site and delivered it on time and in budget.

Please don't hesitate to contact me about any additional information required.

Thank you,
Jennifer Huether, MS
Phone 416-871-3132

To whom it may concern,

I had the pleasure of working with Jason Rundell for just over a year. He was always a delight to work with, very professional and considerate of others around him. Jason is a dedicated employee who puts his all into whatever project he is working on. He works great independently as well as in a team dynamic. He is a quick problem solver and is the first to throw his ideas on the table. Jason would be a true asset to any organization.

Thank you,
Marty Murphy
E Business Leader, Flight Centre Canada
1 Dundas St West, Toronto, ON. M5G 1Z3
Ph: 416 318 6511
marty.murphy@flightcentre.ca

I have worked with Jason on developing a number of social media applications, both in his role at Flight Centre and having engaged his services through Code Summoner, and have always found his work to be of the highest standard.

Jason shows a great deal of knowledge in the ever-changing field of social media, and is committed to keeping up with latest trends and technologies in a dynamic industry. He works well under pressure, delivering high quality work in fast turnaround times.

Although based in different countries, I haven't found this to be a barrier when communicating with Jason, as his correspondence is always prompt and clear. He works well under close instruction, but also shows great initiative in providing valuable solutions.

I highly recommend Jason for web development services and will continue to use his services in the future.

I had originally approached Jason with some modifications I had in mind for my website. I had attempted to build it myself, but I was plagued with problems. I needed some help.

I contacted Jason in a moment of crisis, and he had everything resolved a couple hours later. Response time has always been one of his many fortés, and I believe it is an integral quality in a web developer. With his help, I have learned the skills I need to be self-sustained, but I also know he will be there in a drop of a hat if I need him. I highly recommend working with Jason.

Having Jason as a part of my team was the best thing for the company, he was a team player and an excellent problem solver. He takes responsibility for all projects that he is responsible for and provides the best results.

If you are presented with the opportunity to work with Jason don't hesitate you will not regret it.

Jason is an extremely detail-oriented person who was an absolute pleasure to work with. He always provides creative ideas on how things can be completed more efficiently and effectively. Jason is a great team player and is never afraid to lend a helping hand in any task or request. His excellent knowledge in his field, complemented with his strong work ethic would be an asset to any company!!

- Rina Kazavchinski

I worked with Jason in a digital marketing environment in which my role was in social media marketing and Jason's was in social media development.

Jason was fantastic to work with, he was always able to find an easy way of translating technical language into terms understood by marketers. Jason always ensured that the team was well informed regarding all technical possibilities and new functionality options. Jason created a robust and user friendly content management system for our social media team which we are still using today. Jason advised the team as to how we could utilize his skills and developments to help reach our marketing objectives. Jason helped me to achieve outstanding social media results for the company by building innovative social media apps that integrated seamlessly with the content management system and provided a wonderful user experience.

In addition to Jason's fantastic skills in developing apps, websites and content management systems, Jason is also a great team player who is always supportive of our team and easy to get along with. I highly recommend Jason and look forward to continuing to work with him throughout our careers.
